

KAJAL MEHTA

Full-Stack Developer

✉ mehtakajal796@gmail.com — 📞 7455091699

🌐 [LinkedIn](#) 🐙 [GitHub](#) </> [LeetCode](#)

SUMMARY

Full-Stack Developer skilled in Java, Spring Boot, React, and REST APIs, with experience building scalable applications and integrating AI-powered features using LLMs and AI-assisted development tools.

EDUCATION

Vellore Institute of Technology
B.Tech in Computer Science and Engineering

Expected Graduation: 2027
CGPA: 8.99/10

TECHNICAL SKILLS

Languages: Java, JavaScript, PHP, HTML5, CSS3
Frameworks: Spring Boot, React
Databases: MySQL, PostgreSQL, Redis
Tools: Git, GitHub, Docker, Docker Compose, Postman, VS Code

PROJECTS

BugFlow 🐙 [GitHub](#) *Spring Boot, React, PostgreSQL, Redis, Docker, JWT, Gemini*

- Developed a full-stack bug tracking and project management platform integrating issue tracking, sprint planning, Kanban workflows, and team collaboration.
- Tackled secure project and issue management requirements by engineering REST APIs with Spring Boot, Spring Security, JWT, and RBAC, backed by PostgreSQL and Redis.
- Addressed duplicate bug reports and manual triaging by integrating Gemini and all-MiniLM-L6-v2 embeddings for semantic duplicate detection, automated bug classification, and root-cause analysis.
- Streamlined developer and QA workflows by implementing AI-powered code-fix suggestions, test-case generation, and sprint insights to support debugging and software delivery.

Expense Splitter 🐙 [GitHub](#) *Spring Boot, Flutter, REST API, JWT, MySQL*

- Simplified shared expense management by developing a cross-platform application supporting group expenses, expense splitting, budgeting, and settlements.
- Developed secure REST APIs using Spring Boot and JWT authentication, backed by a normalized MySQL database for managing users, groups, and transactions.
- Implemented graph-based debt simplification using net balances to reduce redundant settlement transactions and streamline repayments among group members.

Zenith List 🐙 [GitHub](#) 🔗 [Live Demo](#) *React, Firebase, Vite, Firestore*

- Addressed fragmented productivity tracking by building a unified workspace for task management, habit tracking, and calendar scheduling.
- Improved application maintainability by designing a modular React architecture with reusable components and React Router for responsive UI and seamless navigation.
- Enabled personalized, real-time productivity tracking by integrating Firebase Authentication and Firestore with interactive dashboards for monitoring task completion and habit consistency.

WORK EXPERIENCE

Junior Associate Developer Intern

Calanjiyam Consultancies and Technologies

Apr 2025 – Present — Remote

- Analyze client-provided documentation and requirements to understand business workflows and translate them into functional application features.
- Build and integrate full-stack features, REST APIs, and database operations across client websites, ERP, and HRMS applications using PHP, HTML, CSS, and JavaScript.
- Handle application deployment, debugging, production issue resolution, and maintenance across client projects.

Open Source Contributor

GirlScript Summer of Code - EXTD

Oct 2024 – Nov 2024

- Contributed to open-source repositories by identifying bugs, implementing frontend features, and submitting code changes through Git and GitHub workflows.
- Achieved Global Rank 81 among 5,000+ contributors through consistent contributions across open-source projects.

ACHIEVEMENTS

- Secured Global Rank 81 among 5,000+ contributors in GirlScript Summer of Code (GSSoC) EXTD 2024.
- Secured Global Rank 9,748 in TCS CodeVita Season 13.
